Al-Naseer Group has a history that comprises of more than five decades. It was 1970, when Dr. Asif Ali Naseer started business as a trader with the name M/S AL-NASEER CHEMICAL CORPORATION.

The motive behind was to earn respectable position among competitors by providing high quality ingredients to cater the needs of food, feed, pharmaceutical and cosmetic industries. In a very short span of time the firm attained good repute in the market due to its services and commitment.

In year 2000, Tahir Ali Naseer elder son of Dr. Asif Ali Naseer joined the firm after completing his MBA from University of The Punjab and contributed his efforts to uplift the organization.

In year 2007, Nouman Asif youngest son started his career as a Co-Partner after completing his Graduation. Al Naseer Chemical Corporation worked hard as a team to serve the industries.

In year 2016, AL-NASEER IMPEX sister concern of Al-Naseer Chemical Corporation was established as a commercial importer to cater the industrial bulk requirement.

Now, Al-Naseer Group deals in more than 150 items including Diluents, Additives, Solvents, Preservatives, Binders, Disintegrants, Food Colours, Powder Flavours and Liquid Flavours etc.

Al-Naseer is working as a distributor of M/S Oleo Corp., M/S Allied Axiom, M/S Ravi Gelatin, and M/S Master Sweetener.

Process of expansion was going on and an idea executed by Al-Naseer group in shape of STITCHOO a stitching unit headed by Dr. M Ali Naseer.

STITCHOO, established in 2018, specializes in international grade stitching, sizing and furnishing with high quality fabric and design while keeping the environment in mind at all of our warehouses and stitching centres.

THE ULTIMATE MEN'S DRESS

STITCHOO is a dynamic and innovative company, run and managed by young entrepreneurs who work with the vision of Quality, Commitment, and Customers' satisfaction.

GUARD GROUP

Guard Filters is pioneer in auto filters & Engine oil manufacturing in Pakistan since 1948 founded by Late Mr. Shafi Malik (Sitar-e-Imtiaz). Guard Filters own one of the biggest filter manufacturing plants in East Asia. We are ISO-9001-2015 and 14001-2015 certified company and committed to provide our customers with quality products at most competitive prices within specified shipping schedule.

We dedicate over 73 years of filtration experience to our customers; in the general industry segment, Guard Filters offers the most comprehensive global manufacturing capabilities in the air filtration industry, and each facility is specifically designed to manufacture and test the most complex clean air solutions. Additionally, each facility manufactures to the appropriate international quality and performance standards. Our goal is excellence in each product we make. Our corporate quality policy best states the Guard Filters commitment. Customer satisfaction and continuous improvement are our highest priorities. Product quality cannot, and will not, be compromised.

One of the big challenges facing society today is safeguarding the cleanliness of air and liquids. Innovative solutions are called for and Guard Filtration Technologies has the answers. We develop solutions that make processes more efficient, save resources and protect our environment, thereby raising the quality of life.

We also have extensive knowledge of the food industry: Seed (Rice, Cotton & Vegetables). Lubricants & Oils: Automotive engine and transmission oils, Hydraulic oils, Brake oil, Engine coolants, Greases.

Guard Group has developed HEPA filter which are best for Pharmaceutical industry, Hospital & Food industry. Guard HEPA Filter is manufactured according to international standards in proper clean room environment. Every filter challenged to the maximum limit with a high concentration of DOP test by using particle counter meter.

An international organization founded in 2011, over years of experience in manufacturing & Service excellence, NGX proudly Claims its presence in Italy, China, France, and now in Pakistan. Rooting from Hong Kong, a trade hub of the world, NXG Impacts always looked forward and provided innovation, high quality, and durable products in multiple domains of irrigation, Care, and audio.

Our Vision

To be our Customer’s first choice when selecting a world-class manufacturer of specialized products, and to be a forerunner of innovation change while providing the finest quality, imaginative innovation & proficient improvement to our customers and the market.

Our Mission

Going towards a constant enhancement plan, and organizational happenings at establishing our company, as a pioneer supplier of superior manufacturing product line of technology, while serving both local and international markets alike.

Our Core Values

We value the ongoing contribution of new and emerging products delivered via new technologies, We’ll proceed to bring reliable products for our customers as we look forward to the next 100 years.

NXG LIFE

“Slow the Flow, Save H2O”

NXG Life’s mission is to provide a wide rang of high-quality, innovative irrigation products. The application of these

Products Include:

- Home Irrigation
- Professional Irrigation
- Landscape Irrigation

SOUND CRUSH

“Hear What You Love”

Sound Crush has always been committed to the design concept of durable, stylish, and high-quality audio devices, including Bluetooth, DAB & FM Radio receivers that have already exported to more than 70 countries of the world.

NXG CARE

“Right care,Right Here”

NXG CARE is a manufacturer dedicated to providing innovative products as the core solution for the global commercial market.

NXG has been a forerunner in technology in several areas to provide customers with innovative products and solutions related to hygiene, environment,health, and smart life.

PAK GUSU TECHNOLOGY (PVT) LTD.
Manufacturer Of Clean Room In Pakistan

Pak Gusu Technology (Pvt) Ltd., is a pioneer clean room manufacturing company in Pakistan. Clean room is going to be essential part of modern Pharmaceutical / Nutraceutical / Hospitals / Laboratories and Food industry. Despite its vital utility, this technology was not available here in Pakistan and our industry had unfortunately been importing it while bearing a lot of hardships like custom tariffs, timeline issues, after-sale support, installation etc.

To overcome the import, time line, design and installation issues it was decided to have a state of the art facility to manufacture Clean room panels and its accessories in Pakistan. This dream come into reality in 2017 when Pak Gusu technology pvt.ltd. Sign agreement with our principle M/s Gusu Purifying technology China (one of the front line clean room manufacturers in the China). In 2018 we complete our production site at 8-Km, Sundar-Raiwand road Lahore and import all machines. By the grace of Allah plant start its production of clean room panels in 2019.

PakGusu bring 20 years experience of our Principle M/s Gusu Purifying technology pvt ltd in the field of research and development, manufacturing, engineering, of complete clean room solution into Pakistan.

We can provide complete Clean room solution start from GMP Pharmaceutical layout , Clean room Panel designing, HVAC designing, Machines layout, and clean room installation under one roof ad same for Hospitals and food industry.

Product Line..... : FLIP OFF / TEAR OFF / PULL OFF SEALS

Welcome to Pharma Packages

Manufacturers of injectable drug products choose Pharma Packages's seals for assured patient safety and product security. Our Flip-Off and Tear-Off seals can authenticate the customer's product, provide excellent machine ability and help maintain closure integrity. Aluminum shells and plastic buttons come in a range of colors and specific use polymer. We also use high quality of Raw Materials for our products.

Vial-based parenteral packaging systems consist of a vial or bottle – usually made of glass – that is closed with a rubber stopper after filling with the medicinal product, before being crimped with an aluminium cap. The preferred execution of a cap comes in the form of a flip cap, consisting of an aluminium shell combined with a plastic disc that must be flipped off with the thumb to access the stopper penetration area. Flip caps therefore consist of two parts – one of aluminium, one of plastic – that are shaped through separate manufacturing processes before being mechanically assembled to make one product.

PROFILE

REGENERATIVE MEDICINE CENTER (RMC).

Osteoarthritis

Osteoarthritis is a disease of joints that effects mainly the knees and hips. However, it can also affect other joints like joints of feet, toes, hands, fingers, elbows, shoulders and spine.

In osteoarthritis, the cartilage in the joints worn out. Cartilage is known as “shock absorber” of the joints and acts as an elastic pad that can cushion blows from the outside and distribute them evenly across the joints.

In order to prevent the bones from rubbing against each other during movement, the ends of the bones are covered with cartilage. Due to osteoarthritis, a damaged joints cartilage become increasingly thin overtime and hence more susceptible to injury. In the final stage, the cartilage vanished and adjacent bones are exposed and rub against each other, causing extreme pain and restrict movement. This result in damage to adjacent bones, muscles, capsule and ligaments.

Osteoarthritis keep progressing over the years and often there are pain free and painful inflammatory phases. In the late stage of osteoarthritis, there is destruction of the joint which result in permanent pain and restricted mobility which adversely affects everyday life and hence reduces the quality of life of affected person.

ABOUT REGENERATIVE MEDICINE CENTER

TCP has opened a Regenerative Medicine Center (RMC) at Mega Medical Complex to provide quality autologous micronized fat, PRP and SVF therapy for Osteoarthritis and other chronic diseases and sports injuries. The center has state of the art automated equipment for micronized fat and SVF preparation. The SVF isolated under the supervision of cell biology experts which have over 10 years’ experience in this field. Our surgeons have vast experience of diagnostics, surgery and they are fully trained to perform best interventions to reduce pain and sufferings of patients.

Our unique practice model provides seamlessly coordinated care under one roof, by the nation’s top specialists resulting in patients returning to their active lifestyle quickly and safely.

ABOUT TCP

Trans Continental Pharma (Pvt) Ltd is a business Organization. It was incorporated as a private limited company with Securities & Exchange Commission of Pakistan in 2003, before registration we were working in style of firm registered with the registrar of firm and societies N-W.F. P since 1995.

Since its inception TCP considerably has a proven track-record in making a fame in the corporate sector of providing class services in the field of Bio-medical equipment’s, Drugs, Labs, Surgical Equipment’s & instruments, now TCP has the honor of introducing “Hospital Management & Healthcare Services” as its pilot project which has been efficacious in creating an evolution towards its vision of “Committed for the cause of Life”.

MICRONIZED FAT THERAPY

Micronized fat is a new therapy in the area of regenerative medicine in which we repair any damage in the body and especially outstanding results were obtained to treat osteoarthritis. The micronized fat is rich in stem cells, cells and growth factors which provide best healing response. It has given hope for new treatment options for many acute and chronic diseases like improvement in bone, joints and also healing of wounds etc.

In this procedure liposuction is done to isolate adipose tissue and later processed by specially designed kits to micro and nano fat which have highest number of viable cells. The fat and SVF is injected into the knee to repair the damaged cartilage. Hundreds of studies have shown that patient improve gradually with loss of pain and also her mobility improves.

(Injection of stem cells for osteoarthritis)

CONSULTANCY

Beside micronized fat and other regenerative medicine therapies, you can also visit our clinic for consultancy and can discuss about micronized fat therapy, its benefits, risks and all other relevant details. Our experts will be happy to help you to better decide about this emerging therapy.

Stages of Osteoarthritis

Stage I: The cartilage injury is mild. The surface of the cartilage top layer is Frayed.

Stage II: The cartilage top layer is only half as thick and frayed. It has fissures and the surface exhibits extensive fraying.

Stage III: The defect reaches deeper down to the bone. The cartilage exhibit severe fraying.

Stage IV: The cartilage is completely eroded away. The bones are exposed and rub against each other.

(Stages of Osteoarthritis)

As well-experienced company, we position our selves as customer-oriented trading company that offers a wide spread product range starting from commodities to best quality specialized ingredients for your particular requirement.

The company provides technical expertise in application development, excellence in logistics support, and outstanding customer service to help its partners grow their business.

Your ongoing success is our goal. This is why we invest so much time in pre-order consulting, in followingup on the implementation of a process or a product, or in assisting your supply chain for complex projects.

Our Philosophy

Quality, reliability and service

Problem solving attitude

We are not satisfied until you are!

Customer Relations

In today's world of continuous industry evolution, we understand the need to provide more than just products. We strive for new thinking, creativity and new business opportunities.

The key to our mutual success lies in our responsible actions to the benefit of our partners.

Through long-term partnerships **Szumex** has the knowledge and capability to improve execution efficiency as well as reduce costs and complexity of our customers' and suppliers' supply chains.

Our Professional local sales and technical team tied with our strong distribution network, ensures that we provide differentiated and value-added solutions to our customers' requirements - whatever their size or level of complexity.

PROFILE

Supplier Relations

We offer customers the broadest range of products from leading producers across Europe, China and all over the world.

Our supply partners are well-known companies with good reputations - prevailing market leaders in their fields, and global players of importance - who have proven and successfully established themselves in the market.

Distributorship

We are pleased to announce that **Szumex International** is an exclusive distributor of Meggle's Lactose Monohydrate 200 (Meggletose F 200 & B 200 in Pakistan.

Products range overview Our broad portfolio covers hundreds of best-quality raw chemicals, from commodities to specialties. We purchase from innovative and premier producers and source from the best in emerging markets.

Product Line :

UHealth Group has more than a decade's experience in the healthcare sector, and is known for providing quality healthcare and valuable experience to all domestic patients through TeleMedicine. Our healthcare offerings is driven by discovery, innovation and a deep responsibility for the health of our communities and is supported by a team of compassionate and dedicated medical professionals who have rich knowledge and experience in their respective domains.

At **UHealth International Hospital** we believe to stand out comparing other hospitals by putting in efforts to make this healthcare facilities a modern state of the art information technology unit, using Artificial Intelligence aimed at providing preventive and diagnostic solution with our AI Research & Development center, hence felicitating TeleMedicine Clinics across Pakistan's rural areas and Internationally as well.

UHealth will be amongst Pakistan's few hospital to have a proper Palliative Care unit. Defining characteristic of UHealth today is the ability to continually deliver great services in the medical field. For instance, UHealth International Hospital was among few Pakistani institutions that started with applications of adipose-derived mesenchymal stem cells (MSC) in clinical practice, more precisely, to use MSC for cartilage repair. UHealth's orthopedic team, for the first time in the country, made a new medical alternative: the meniscal transplant, an hour-long, outpatient, arthroscopic procedure that uses donor tissue to replace damaged meniscus, which can dramatically slow the onset of arthritis. In addition to meniscal transplant, as of recently, we are also successful in applying a new biological treatment: meniscus replacement with the synthetic implant. Furthermore, we are in the process of developing stem cell lab to produce stem cells locally.

Our Mission

To create a network of primary, secondary and tertiary Healthcare Facilities across Pakistan and around the world connected through modern communication technology and using Artificial Intelligence aimed at providing preventive, corrective and maintenance Healthcare making it accessible, affordable and efficient.

Our Vision

To extend quality healthcare to every individual of Pakistan and beyond, using Innovative Technologies. Minimizing pain of unserved and underserved rural population when in need of medical assistance.
